Pune, India | P: 9284248244 | anushkagangwal1618@gmail.com | [linkedin.com/in/anushka-gangwal-020167332](https://www.linkedin.com/in/anushka-gangwal-020167332)

EDUCATION

MIT-ADT University, Pune

Bachelor of Engineering

Major in Computer Science (AI & Analytics)

CGPA: 9.08 / 10

2024 – 2028

SUMMARY

Second-year B.Tech CSE student with 9.08 CGPA, experienced in Python-based application development. Actively building foundational skills through certifications, simulations, and team-based projects. Seeking to contribute to large-scale distributed systems in an agile engineering environment.

PROJECTS

EEG Headband – Smart Wearable

Team Project

- Co-developed a concept for a wearable device to monitor seizures
- Explored basic EEG sensor applications and their real-world use cases
- Contributed to documentation and idea presentation
- Improved understanding of hardware and software integration

Password Strength Checker + Breach Detector

- Built a Python-based password security tool that evaluates strength using entropy scoring across length, complexity, and pattern checks
- Integrated HaveIBeenPwned API using k-anonymity model to check passwords against 600M+ breached records without exposing raw input
- Tested tool against 100+ password samples across weak, medium, and strong categories

CERTIFICATIONS

Google Cybersecurity Professional Certificate

- Developed skills in data analysis for security events, risk assessment, and incident investigation
- Gaining foundational understanding of security concepts, threats, and best practices

Deloitte Australia – Cyber Job Simulation

- Completed practical tasks related to cybersecurity analysis
- Gained exposure to real-world security scenarios and problem-solving approaches

RESEARCH EXPERIENCE

Comparative Study of Cloud vs Edge Semantic Segmentation using U-Net

- Co-authored a research paper on cloud vs edge semantic segmentation using U-Net
- Implemented a U-Net based deep learning model for semantic segmentation on aerial drone imagery
- Conducted comparative analysis between **cloud (GPU)** and **edge (Jetson)** deployments
- Analyzed trade-offs between **accuracy** and **real-time efficiency** for autonomous drone systems

ACTIVITIES

Technical Member – CodeChef Club (College)

- Participated in coding sessions and problem-solving discussions
- Practiced DSA problems and collaborated with peers in learning activities

SKILLS

- **Technical Skills:** Python, Cybersecurity Fundamentals, DSA, SQL, HTML
- **Tools:** Canva, Figma, VS Code, Git & GitHub, Linux
- **Soft Skills:** Team Collaboration, Time Management, Adaptability
