EDUCATION

Birla Institute of Technology Mesra, Ranchi

Bachelor of Technology – Computer Science and Engineering

2022 – Present

CGPA: 8.27

Rajkamal Saraswati Vidya Mandir, Dhanbad

Class XII, CBSE

2020 – 2021

Percentage: 94.8%

WORK EXPERIENCE

Oracle

Software Engineering Intern | Playwright, Cypress, JavaScript, Python, MCP Servers, LLM Integration

Jan 2026 – Present

Hyderabad, India

- Engineered an **end-to-end automated pipeline** to generate executable Cypress code directly from raw Jira test specifications.
- Integrated the **Zephyr MCP Server** to fetch and semantically structure test case metadata from Jira.
- Leveraged **Playwright MCP Server** to crawl live web pages and extract precise UI element selectors for targeted test coverage.
- Architected a **custom MCP Server** using LLM to translate Playwright selectors into complete, idiomatic Cypress suites.
- Implemented **self-healing capabilities** to auto-adapt locators upon UI changes, boosting suite pass rates from **66% to 94%**.

Atlassian | Certificate

Software Engineering Intern | Java, Kotlin, Spring Boot, ReactJS, TypeScript, Apache Flink, Apache Pinot, AI Gateway, RESTful APIs, SQL

May 2025 – July 2025

Bengaluru, India

- Built **REST APIs** (Kotlin + Spring Boot) to serve aggregated error classification data with optimized Apache Pinot queries.
- Developed **React/TypeScript** dashboard to visualize error breakdowns and flaky test insights for engineering teams.
- Integrated Atlassian's internal **AI Gateway** to deliver root cause analysis and recovery suggestions for failed builds.
- Implemented **egress-based token auth** with environment-specific config across dev/stg/prod for secure AI communication.
- Architected an **Apache Flink** pipeline to process high-volume test logs from S3, classify errors via regex, and ingest into Pinot.

PERSONAL PROJECTS

Trackify | GitHub

Real-time AI-assisted expense tracking with group collaboration and analytics

- Tools & Technologies:** React.js, Next.js, Tailwind CSS, Convex, Clerk, Google Gemini API
- Architected a **scalable full-stack platform** with Convex for real-time state sync and Clerk for auth; designed smart split and group expense tracking with an intuitive UX.
- Integrated **Google Gemini API** to auto-generate expense entry forms and AI-powered summaries, significantly reducing manual data input and improving usability.
- Built analytics dashboard with debt simplification algorithms, dynamic filters, and spending insights; implemented currency-aware tracking and multi-user group management.

Medi-Care | GitHub

Full-stack hospital management and doctor appointment booking system – MERN stack

- Tools & Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, Stripe, Cloudinary, Tailwind CSS
- Built **RESTful backend APIs** with JWT-based auth and role-based dashboards: patients book, pay, and rate doctors; doctors manage appointments and profiles end-to-end.
- Integrated **Stripe** for secure payments and **Cloudinary** for media storage; implemented fully responsive UI with Tailwind CSS across all device sizes.

TECHNICAL SKILLS

Languages	C/C++, Python, Java, Kotlin, HTML, JavaScript, TypeScript
Frameworks	ReactJS, NextJS, ExpressJS, NodeJS, Spring Boot, Tailwind CSS, Apache Flink
Tools & DevOps	Git, GitHub, Docker, Kubernetes, Cypress, Playwright, CI/CD Pipelines
Cloud / Databases	MongoDB, MySQL, AWS S3, Apache Pinot
AI / MCP Tools	Google Gemini API, Atlassian AI Gateway, MCP Servers, LLM Integration
CS Fundamentals	Data Structures & Algorithms, System Design, OOPs, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved **1100+** problems across LeetCode, Codeforces, GeeksforGeeks & CodeChef, maintained a **365+ days** streak on LeetCode.
- Earned the **LeetCode Knight** badge with a contest rating of **1855**, placing in the **top 5%** globally among all rated contestants.
- Achieved a rank of **771** in **Weekly Contest 459** and **711** in **Biweekly Contest 161** on LeetCode.
- Finalist & Team Lead**, Atlassian ShipIt Hackathon – delivered an Environment Scheduler feature for Bitbucket Pipeline.
- Winner**, Business Plan Competition by IIC, BIT Mesra (50+ teams) – pitched startup idea to expert jury.

POSITIONS OF RESPONSIBILITY

- Placement Executive**, Department Placement Unit – CSE
Organized and conducted training sessions and soft skill development activities for **950+** students in the CSE department, coordinating with faculty and industry professionals.
- Cyber & Web Coordinator**, National Service Scheme
Led end-to-end development and upkeep of the NSS website, enhancing usability, reach, and online presence for the institute's social outreach initiatives.
